

Data Sheet

High speed recovery for your PC.

Introducing next generation recovery technology from Persysistent Software - the innovators in PC repair.

Thanks to Persysistent Solo, it is no longer necessary for users to roll back their PCs to “day one or out of the box” in the event of corruption or failure. In fact, “re-imaging” is now a thing of the past as Persysistent Solo dynamically captures the most up-to-date PC repair point (Operating System, profile & applications). On-demand, you can instantly roll back the PC to the stored repair point - all in less than 30 seconds.

Ideal for remote office, mobile customers and businesses with up to 25 PCs, Persysistent Solo is the fastest, network-independent repair solution on the market. It even works if the OS cannot engage.

Key Features

- Repairs PCs on-demand in less than 30 seconds!
- The only file level repair product available
- Easy to use UI allows users to “set and forget” their repair points
- Restores only the corrupted, changed or missing files
- Stores up to 5 unique PC images or repair points
- Captures all recovery actions in a “heal log” file that is available for reporting or auditing
- Limits drain on storage space by compressing repair point 2:1
- Protects repair point in a hidden cache partition
- Preserves personal settings
- Controls repair and image settings from a Systray agent

Benefits

Increases PC Uptime for Users

- Virtually eliminates Operating System and application-related down time
- Reduces need to ship or drop off laptops for repairs; faster user profile recovery
- PC users remain productive no matter when and where they work
- PCs perform better when they are not degraded by configuration drift

Reduces Cost for MSPs

- Significantly reduces support calls; eliminates most non-hardware related tech support calls
- Reduces desktide deployment costs by reducing the need for PC re-imaging
- Reduces repair time and improves user satisfaction

DAMAGE CONTROLLED™

Persystem Solo is easy to use - just point and click to perform repair on demand or create a new repair point.

Persystem Solo users can easily see their repair points and can rename them or delete them as needed. Up to 5 repair points can be stored and updated as often as they choose.

Windows XP supported.

Pricing

\$36/year subscription
\$79.99 for 3 pack
