

World's Fastest "Self-Healing" PC Recovery Software Automates Imaging, Compliance and OS Migrations

Recovery

The self-healing technology of Persysent Suite restores end user PCs to a clean, current repair point - automatically or on demand. All operating system, registry and applications files that have been changed or deleted are restored and all non-compliant files that have been added are removed.

Imaging

Whether you've got 10 or 10,000 new PCs to roll out, when it comes to imaging there's no better place to start than with Persysent Suite. The entire imaging process is completely automated from end to end. Customizable client build tasks allow IT to walk away and multi task during imaging.

Compliance

Persysent Suite offers a flexible compliance solution that makes desktop compliance simple and automatic. IT can customize enforcement by choosing the level of management for each PC or by group policy - whether moderately managed, totally locked down, or highly managed -- it all depends on what works for your organization.

OS Migrations

Persysent Suite makes the OS migration process seamless and automated with the least possible disruption to end users.

Key Features

World's Fastest "Self-Healing" PC Repair - Repairs Windows 7, XP and Vista operating system files and application files

Works On or Off the Network - Great whether you're supporting PC end users in the office or on the road.

Works Even if the OS Doesn't - Works in pre-boot, enabling self-healing repair even if the OS can't engage.

Works Automatically and On Demand - IT administrators can schedule a repair or set the automated repair for each boot cycle.

Single-Instance File Storage/File-Level Imaging - Persysent only repairs the files that need to be repaired.

Scripted Boots and Installations - Customizable client build tasks allow IT to walk away and multi task during imaging.

Automates OS Migrations - Migrate from Vista and XP to Windows 7, while preserving end user settings & profiles.

Flexible "Lock down" Options - OS and application management: full lock down, no lock down and semi lock down.

Web-Based Console - Set policies, schedule tasks & updates and run reports from a web-based console.

PC Power Management - Save thousands of dollars in energy costs by implementing a PC power management policy.

What's New in 4.5

Automates Windows 7 Migration - Determines Windows 7 "readiness" by comparing current inventory against minimum Windows 7 requirements, indicating which computers are ready and which are not. Also includes pre-defined migration tasks to automate the process.

Windows 7 Compatibility - Repairs Windows 7 machines by comparing files to base repair point and restoring computer to desired repair point.

Third Party Integration Enhancements - Includes integration with SCCM to support XP, Vista and Windows 7.

Expanded Platform Support - Now supports 64-bit clients.

Windows Server W2008 R2 Persistent Server Support

Hyper-V Support

Key Benefits

- Ensures end users remain productive, no matter when and where they work.
- Reduces support calls and desk side visits, and the need to ship machines for repair.
- Automatically enforces corporate configurations.
- Improves success rate of patches and updates.
- Reduces deployment costs by automating the imaging process, virtually eliminating the need to re-image PCs.
- Allows IT administrators to set policies, schedule tasks, schedule updates and run reports from a web-based console.
- Enables seamless, automated OS migrations -- including from XP or Vista to Windows.
